# Angular / React Developer

## **Description**

AngularJS/React Developer responsible for the client side of our service. Your primary focus will be to implement a complete user interface in the form of a mobile and desktop web app, with a focus on performance. Your main duties will include creating modules and components and coupling them together into a functional app. The artistic design will be delivered to you, together with a few HTML templates, but we will ask for your help in regard to animations, CSS, and final HTML output. You will work in a team with the back-end developer and communicate with the API using standard methods. A thorough understanding of all of the components of our platform and infrastructure is required.
